Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8, 10, 11, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishiura et al. (USPN 6112974).

Nishiura teaches a method of wire bonding by forming a bond at a first bonding point and moving the tool away from the first bond, forming a kink and loop in the wire having a curved portion wherein the tool is moved substantially vertically upwards and toward the second bonding point (figure1 and col 3 line 28 – col 4 line 53).

Conventional bonding is also disclosed wherein the tool is moved substantially vertically upwards and away from the second bonding point (figure 6).

3. Claims 1, 3-8, 10, 11 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Muchida (US 2004/0041008 A1).

having a curved portion wherein the tool is moved substantially vertically upwards and away from the second bonding point (figure2 and paragraphs 58 and 63-69).

Allowable Subject Matter

4. Claims 9, 12, 13, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art teaches the invention essentially as claimed with low loop heights but does not teach a relationship between wire diameter and loop height.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujisawa (US 2004/0104477 A1), Babinetz et al. (US 2004/0152292 A1) and Nishiura et al. (USPN 6182885 B1).
